

ELENA STENINA

Senior Front-End Engineer (Angular) | 8+ Years | Angular • TypeScript • RxJS • NgRx • .NET Core APIs

Charleston, SC area (open to remote) • elenastdeveloper@gmail.com • 854-444-0953 • linkedin.com/in/elenastenina • github.com/elenastenina

PROFESSIONAL SUMMARY

Senior Front-End Engineer with 8+ years designing, building, and owning production-grade Angular applications for enterprise platforms serving 50K+ users. Deep hands-on expertise across the Angular ecosystem (TypeScript, RxJS, NgRx, component architecture) paired with strong backend fluency (.NET Core APIs, SQL Server) for true end-to-end ownership. Experienced defining front-end architecture and coding standards, leading UI modernization initiatives, and mentoring engineers. Comfortable translating complex business logic into secure, performant, accessible user interfaces, with a track record of production reliability through hands-on incident response.

CORE TECHNICAL SKILLS

Front-End: Angular (v8–v21), TypeScript, JavaScript (ES6+), RxJS, NgRx, Component-Based Architecture, State Management, Reusable UI Components, Kendo UI / Telerik, Bootstrap, HTML5, CSS3, Accessibility (WCAG), Responsive & Cross-Browser Development

Back-End & APIs: C# / .NET Core, .NET Framework, ASP.NET Web API, RESTful APIs, Microservices, Authentication/Authorization Flows, Entity Framework, LINQ

Data: SQL Server, T-SQL, Query Optimization, Stored Procedures, Schema Design, Relational Database Principles

Cloud & DevOps: Google Cloud Platform (GCP), CI/CD (Jenkins, Octopus Deploy), Production Incident Response (PagerDuty)

Testing & Practices: Jasmine, Karma, xUnit, Code Reviews, Mentorship, Agile/Scrum, Git/GitHub, Jira

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Cotality (formerly CoreLogic)

Dec 2021 – Jun 2026

- Defined and drove front-end architecture and coding standards for a multi-application Angular platform serving 50K+ users, directly shaping the modernization direction adopted by the broader engineering team.
- Owned end-to-end Angular upgrades from v16 → v21 across production applications with zero-downtime releases, including resolution of complex Kendo UI / Telerik compatibility issues — cut post-release defects by ~40%.
- Built and maintained reusable component patterns and shared UI building blocks used across multiple product teams, improving consistency and development speed.
- Refactored .NET Core Web APIs and optimized SQL Server query patterns, reducing payload size and latency for data-heavy, customer-facing workflows.
- Integrated front-end applications with authentication/authorization flows and REST APIs, ensuring secure handling of sensitive business data.
- Mentored engineers through code review and pair programming; onboarded new team members to Angular architecture and codebase standards, reducing ramp-up time.
- Owned production reliability via 24/7 on-call rotation (PagerDuty) — diagnosed and resolved high-severity front-end and API incidents, authored postmortems, and drove reliability follow-ups.
- Managed release lifecycle through Jenkins and Octopus Deploy CI/CD pipelines, including staged rollouts and regression testing for front-end deployments.

Software Engineer — Johnson & Johnson

Jun 2020 – Nov 2021

- Designed and built scalable Angular + .NET Core applications for internal business platforms used across multiple product teams, owning front-end delivery from requirements through release.
- Partnered with backend engineers on REST API contract design and versioning strategy to support clean front-end/backend integration.
- Optimized SQL queries and data access patterns feeding data-intensive UI screens, improving page load times.
- Collaborated with Product, QA, and DevOps in an Agile/Scrum environment, contributing to sprint planning and technical scoping.

Software Engineer — Berkeley Electric Cooperative

Sep 2017 – May 2020

- Developed full-stack applications (C#, .NET, Angular, JavaScript, SQL Server) supporting internal operations for a regional utility serving 100K+ members.
- Owned front-end features end-to-end from stakeholder requirements through production deployment.

- Authored complex reports and database queries that improved data accessibility for operations and finance teams.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Software Development — Western Governors University
Google Cloud Certified (2022)
